# SEBO AIRBELT D1 Kombi, D4 and D4 Premium

The three AIRBELT D models are powerful, full-size, ultra-quiet canister vacuums with three on-board attachments, a giant 6 litre bag, an unmatched 40-foot cord with 52-foot cleaning radius, protective rubber-coated wheels, a durable telescopic tube with quick-release connections, and a full bag or clog indicator.

They also feature a one-of-a-kind LED indicator that enables suction power to be monitored. A unique tapered suction hose with a 320° rotating canister connection increases airflow velocity, minimizes clogs, and improves maneuverability.

Black Cherry Lava with
Kombi Nozzle
#90604FC

## AIRBELT D1 Kombi

### Kombi Nozzle but No Powerhead

The D1 has a telescopic tube and suction hose without an integrated power cord, so it cannot accommodate an electric powerhead. Instead, it includes the straight-suction combination nozzle, with retractable bristles, to clean rugs and hard floors.

### Suction Adjustment Switch on Canister Body

The suction adjustment switch is located on the canister body, not the handle.

## AIRBELT D4 and D4 Premium

### Durable Powerhead with Manual Height Adjustment, Amazing Steering Ability, and Manual Brush Shut Off

The D4 comes standard with the 12-inch commercial-grade ET-1 powerhead and can clean carpets and hard floors. It easily removes pet hair and offers four-level, manual brush height adjustment. To clean delicate rugs and hard floors with straight suction, the brush roller can be manually switched off. Its 180° steering ability provides amazing maneuverability.

AIRBELT D4 Red with
Parquet Brush
#90630FC

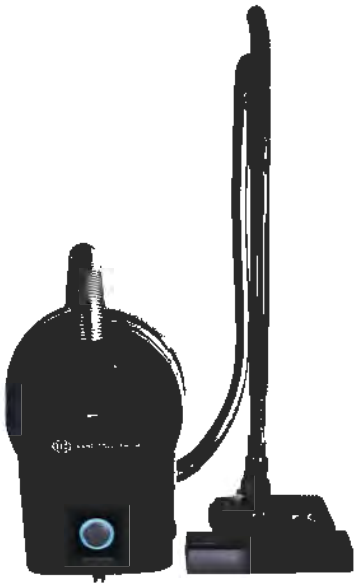
### Easy Brush Roller Removal, User Warning Lights, and Automatic Obstruction Shut Off

The ET-1 has an easy, tool-free brush roller removal, a handy clog removal door, and a red warning light, with automatic shut off for brush roller obstructions. Also, its warning light remains illuminated during use, when brush height is set too high for optimal cleaning, or when the brush roller needs replacing due to bristle wear.

### Suction Adjustment Switch on Handle

The D4's suction power can be adjusted on the hose handle so upholstery can be cleaned with stronger suction and curtains can be gently vacuumed with a lighter suction.

(Also available in Red 90648FC and Arctic White 90641FC)



AIRBELT D4 Premium
Black with ET-1 and
Parquet Brush
#90640FC

# Additional Features:

### Durable, Rotating, Suction-hose Connection

A brilliantly designed hose-to-canister connection allows 320° rotation of the suction hose, providing easier user movement and machine maneuverability.

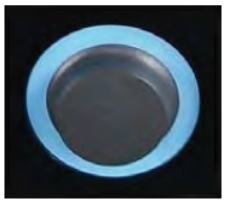
### Three Full-size, On-board Tools

A crevice tool, an upholstery nozzle, and a dusting brush are integrated into the canister body, so they are on-board and ready for use at all times. Also, many optional attachments are available.

### Full Bag or Clog Indicator

When a full bag, clog in the airflow pathway, or an excessively dirty microfilter is detected, an indicator window turns orange and an airflow bypass valve opens. This prevents overheating and motor damage from a lack of adequate airflow.

### LED Suction-power Indicator



This technology actually makes it possible for the user to optically monitor the vacuum's suction power. When using lower power settings, the LED light rotates slowly. When using higher power settings, the light rotates more quickly. When the power is set to standby mode, the light slowly blinks back and forth, left to right.

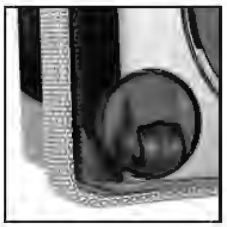
### Three-step, Hospital-grade Filtration

It features a pre-motor filter, a three-layer Ultra Bag, an S-class exhaust microfilter, and a tightly sealed casing, which prevents dirty air from escaping through its seams.

### Control-switch Cord Rewinder

Its super-long power cord rewinds by simply pressing a button.

### Patented AIRBELT Bumper



The soft, textile-covered, foam bumper protects furniture, walls, and the vacuum itself from incurring scratches and scuffs during use. The bumper also diffuses exhaust air, which contributes to its ultra-quiet performance.

### Full-size Canister Vacuum

The AIRBELT D models are full-size canister vacuums that are larger, more powerful machines, offering a giant filter bag and an extra-long power cord.

### Convenient Parking and Storage Aids

After the work is done, the suction hose and telescopic tube, with parquet brush or combination nozzle, can be firmly stored on the canister's underside or backside housing.

### Flat-to-the-floor, 3.5-inch Profile

A low, cleaning-head profile makes reaching under furniture and beds easy!

### Giant, 6 Litre Filter Bag

The large filter bag is convenient and economical because fewer bag changes are needed and closing its built-in hygiene cap prevents dust from escaping during bag disposal.

# STANDARD FEATURES OF SEBO VACUUM CLEANERS

## World's Best Pet Vacuums

Because of superior powerhead and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

## S-Class Filtration

Three stages of hospital-grade filtration ensure long-lasting performance and cleaner air. Each model is equipped with an S-class, pre-motor microfilter, a three-layer Ultra Bag, and an S-class or optional HEPA, exhaust micro-filter. This system provides long-lasting filtration with smooth airflow, excellent suction performance, and meets the special demands of users with allergies or asthma.

## Tightly Sealed Vacuums

Dirty air that flows through a vacuum can only be filtered completely if it does not escape into the room through seams or seals in the machine. Therefore, all SEBO vacuums are tightly sealed throughout to completely filter the air.

***The British Allergy Foundation recommends SEBO filters as they are excellent for users with allergies or asthma.***

### *Did you know?*

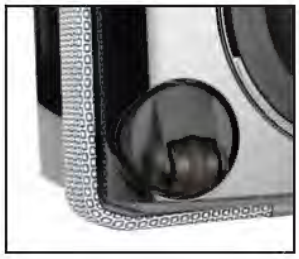
Most vacuum cleaner manufacturers make high-filtration claims based on specifications of the filter material that are measured in a laboratory, and not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. **The filtration effectiveness of each SEBO vacuum is tested while they operate.**

## Changing Bags is Easy and Clean

SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

## Rubber Wheels and Soft Bumpers Protect Homes

Smooth-gliding rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the powerheads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.



## Advanced, Brush-Roller Technology

SEBO's brush rollers are uniquely designed to funnel hair and debris into the powerhead's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

## Reliable, Commercial-Grade Components

All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. This means all SEBO customers own reliable, long-lasting vacuum cleaners.

## Incredible Warranty Coverage

All SEBO models include a **FREE TEN-YEAR WARRANTY** on the motor and non-wear parts and a 5-year warranty on labor charges (must complete online warranty registration on our website at sebocanada.ca to qualify).

The AUTOMATIC X models offer a lifetime belt warranty.

# OUR SEBO STORY

SEBO was established in 1978 by two German engineers, Klaus Stein and Heinz Kaulig, who were seeking to build a reliable, powerful, and easy to use commercial upright vacuum cleaner. The name SEBO stands for **SE**migewerbliche **BO**denpflege, which is German for semi-commercial floor care.

The first shipment of vacuums to the U.S.A. was in 1979 for commercial cleaning customers, followed by the Duo-P Cleaning Powder in 1984, and finally the household vacuums were launched in 1997.

Since then, SEBO has become the most important manufacturer of high-quality, commercial vacuum cleaners in the world, with sales in Europe, Asia, Africa, and North America. Millions of SEBO vacuums have been sold to hotels, hospitals, schools . . . even The White House!

Today, SEBO is the global leader in commercial upright vacuums and stands as a synonym for high-quality vacuums in commercial and retail markets worldwide.

## SEBO was the WORLD'S FIRST vacuum manufacturer to introduce:

- An integrated suction hose on an upright vacuum
- A timing-belt-driven brush with clutch protection
- A dust bag that fills from the top, followed by a microfilter and then the motor
- An electrostatic microfilter
- An electronic brush control and safety shut off
- A soft bumper on a canister vacuum, which protects furniture and walls from damage
- An electronically controlled automatic height adjustment, an S-class filtration, and a detail wand with telescopic hose

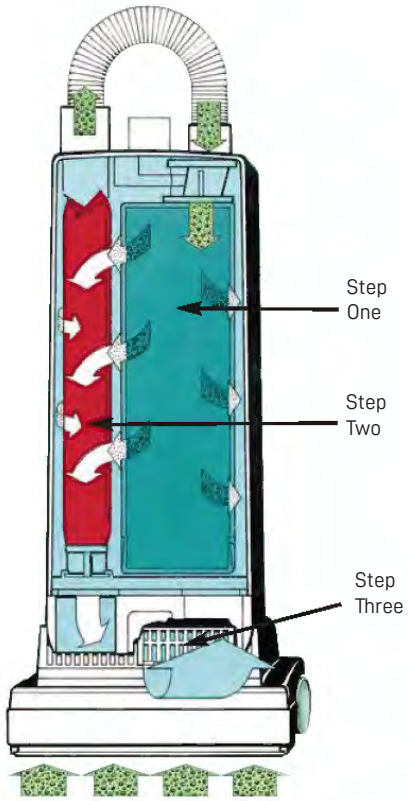
**To this day, they are the most modern vacuum cleaners in the world!**

# THE SEBO FILTRATION SYSTEM

### Why Are Bags Better?

Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.



### *Did you know?*

The micro-filters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Bagless vacuum micro-filters are expensive and usually cost more than a multi-year supply of SEBO filter bags.
