SEBO FELIX Premium and FELIX 4 Kombi

The stylish FELIX offers all the flexibility of a canister vacuum cleaner in an upright configuration!

It has highly maneuverable, 180° steering ability, a convenient instant-use suction hose, an ultra-modern filtration system, and a detachable suction unit, with variable suction control that becomes a hand-held vacuum. It includes the 12-inch-wide ET-1 powerhead with a four-level manual height adjustment, that cleans both carpets and hard floors and easily removes pet hair. In addition, its spinning brush roller can be shut off to clean delicate rugs and hard floors with straight suction.

Amazingly, the FELIX can even morph into a hard-floor polisher by attaching SEBO's DISCO head.

Superb Steering Ability

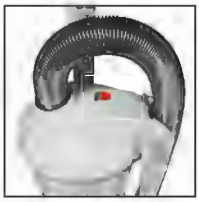
A unique, 180° turning powerhead offers excellent maneuverability around and under furniture.

Multi-surface Cleaning Capabilities

With a 12-inch powerhead for carpets, offering a 10.5-inch cleaning path, and a parquet brush for hard floors, the FELIX provides all the cleaning flexibility of a canister vacuum, and it can morph into a hard-floor polisher by adding a DISCO head (see page 26 for more info).

Additional Features:

Full Bag or Clog Indicator



When there is a full bag, a clog in the airflow pathway, or a dirty micro-filter, an indicator window on the bag housing lid fills with orange color, and an airflow bypass valve opens to prevent overheating and motor damage.

Flat-to-the-floor 6-inch Profile

The vacuum's low profile makes cleaning under furniture and beds easy!

Variable Suction Control on Handle with Soft Start

The user can select the suction power needed, from curtains to carpet. Its gradual power-up extends motor life.

Three-level, Adjustable Handle

This feature provides compact storage, maneuverability when the suction unit is detached, and easy adjustment to user height requirements.

Detachable Suction Unit Creates a Hand-held, Portable Vacuum

Remove the powerhead to transform it to a handheld portable vacuum, ideal for cleaning stairs, upholstery, and car interiors. It can be easily carried using its alternative side handle or its shoulder-strap attachment.

Large-capacity Filter Bag

The 3.5 litre, three-layer Ultra Bag is economical because fewer bag changes are needed. Closing its hygiene cap prevents dust from escaping during bag removal or disposal.

Easy Maintenance

The clog removal door and replaceable brush roller are easy to access on the powerhead.

Thirty-one-foot Cord with Rotating, Quick-release Hook

It is easy to quickly unwind the power cord by rotating the hook!

Innovative Exhaust Filter

Behind the stylish surface hides an ultra-modern, S-class, exhaust micro-filter that provides excellent filtration and absorbs motor noise, resulting in extremely quiet operation.

Four-level, Manual Height Adjustment

The brush height can be adjusted up or down for optimal cleaning effectiveness.

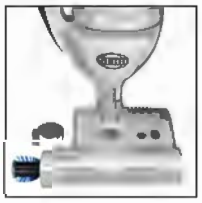
Brush Obstruction Light with Automatic Shut Off

If an obstruction jams the brush roller a red warning light on the powerhead flashes and the brush roller stops spinning. This feature prevents the belt from breaking and protects the motor and carpet from damage.

Incorrect Height Setting or Worn Brush Light

When brush height is set too high for optimal cleaning, or when the brush roller should be replaced because of reaching maximum bristle wear, a red warning light on the powerhead remains illuminated during use. The light shuts off when the condition is corrected.

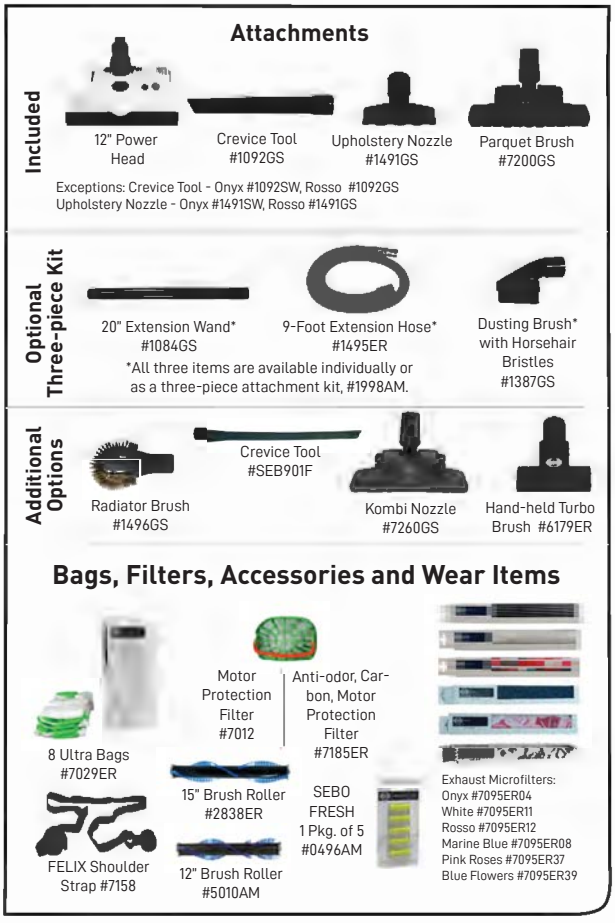
Easy Brush Removal and Cleaning



Cleaning hair or other debris from the brush roller, or replacing it when its bristles are worn, is quick and easy, and no tools are required! This feature ensures consistently effective brush agitation of the carpet pile.

Manual and Automatic Brush Shut Off

Turn off the brush roller by pressing the green on/off button located on the powerhead to clean delicate rugs or hard floors. Also, the brush roller automatically shuts off when the suction hose is removed from its housing port, or when the handle is in its upright, locked position.



STANDARD FEATURES OF SEBO VACUUM CLEANERS

World's Best Pet Vacuums

Because of superior powerhead and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

S-Class Filtration

Three stages of hospital-grade filtration ensure long-lasting performance and cleaner air. Each model is equipped with an S-class, pre-motor microfilter, a three-layer Ultra Bag, and an S-class or optional HEPA, exhaust micro-filter. This system provides long-lasting filtration with smooth airflow, excellent suction performance, and meets the special demands of users with allergies or asthma.

Tightly Sealed Vacuums

Dirty air that flows through a vacuum can only be filtered completely if it does not escape into the room through seams or seals in the machine. Therefore, all SEBO vacuums are tightly sealed throughout to completely filter the air.

The British Allergy Foundation recommends SEBO filters as they are excellent for users with allergies or asthma.

Did you know?

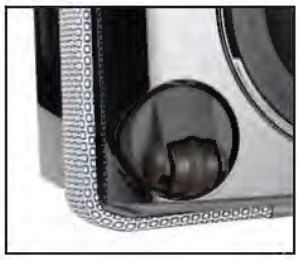
Most vacuum cleaner manufacturers make high-filtration claims based on specifications of the filter material that are measured in a laboratory, and not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. **The filtration effectiveness of each SEBO vacuum is tested while they operate.**

Changing Bags is Easy and Clean

SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

Rubber Wheels and Soft Bumpers Protect Homes

Smooth-gliding rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the powerheads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.



Advanced, Brush-Roller Technology

SEBO's brush rollers are uniquely designed to funnel hair and debris into the powerhead's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

Reliable, Commercial-Grade Components

All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. This means all SEBO customers own reliable, long-lasting vacuum cleaners.

Incredible Warranty Coverage

All SEBO models include a **FREE TEN-YEAR WARRANTY** on the motor and non-wear parts and a 5-year warranty on labor charges (must complete online warranty registration on our website at sebocanada.ca to qualify).

The AUTOMATIC X models offer a lifetime belt warranty.

OUR SEBO STORY

SEBO was established in 1978 by two German engineers, Klaus Stein and Heinz Kaulig, who were seeking to build a reliable, powerful, and easy to use commercial upright vacuum cleaner. The name SEBO stands for **SE**migewerbliche **BO**denpflege, which is German for semi-commercial floor care.

The first shipment of vacuums to the U.S.A. was in 1979 for commercial cleaning customers, followed by the Duo-P Cleaning Powder in 1984, and finally the household vacuums were launched in 1997.

Since then, SEBO has become the most important manufacturer of high-quality, commercial vacuum cleaners in the world, with sales in Europe, Asia, Africa, and North America. Millions of SEBO vacuums have been sold to hotels, hospitals, schools . . . even The White House!

Today, SEBO is the global leader in commercial upright vacuums and stands as a synonym for high-quality vacuums in commercial and retail markets worldwide.

SEBO was the WORLD'S FIRST vacuum manufacturer to introduce:

- An integrated suction hose on an upright vacuum
- A timing-belt-driven brush with clutch protection
- A dust bag that fills from the top, followed by a microfilter and then the motor
- An electrostatic microfilter
- An electronic brush control and safety shut off
- A soft bumper on a canister vacuum, which protects furniture and walls from damage
- An electronically controlled automatic height adjustment, an S-class filtration, and a detail wand with telescopic hose

To this day, they are the most modern vacuum cleaners in the world!

THE SEBO FILTRATION SYSTEM

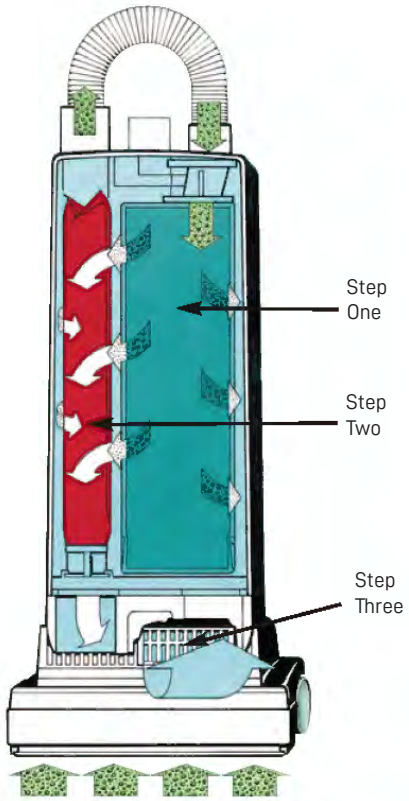
Why Are Bags Better?

Top-fill, three and four-layer Ultra Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be tightly sealed with a hygiene cap when full, so no dust can escape into the air during bag removal and disposal.

Did you know?

The micro-filters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Bagless vacuum micro-filters are expensive and usually cost more than a multi-year supply of SEBO filter bags.



SEBO

MADE IN GERMANY

10 YEAR PARTS • 10 YEAR MOTOR
10 YEAR WARRANTY
5 YEAR LABOUR

A lot can happen in 10 years.

We have you covered.
